(a) Two score distributions and a threshold
negatives (noise)
positives (signal + noise)
TPR = P(s > t | +) = 0.69
FPR = P(s > t | −) = 0.16
threshold t
density
score s(x)
(b) ROC curves
true positive rate
false positive rate
t = 1
d′ = 0.5
d′ = 1.5
d′ = 3.0
